Product Segments

- **Care Motion**
- **Ergo Motion**

TL24 electric lifting column is designed for medical applications such as height adjustable workstations, screens and optical machines. TL24 provides multiple cable exit options, such as from top end socket or top/bottom sides; besides, TL24 also support "direct cut system" which can be operated without control box, connecting the main power and hand control directly. The TL24 features an extruded aluminum rectangular 2 stage appearance.

Note

- Parameters above are from tested average, please refer to approval drawing for final value.
- The current & speed in table are tested with 24V DC motor. With a 12V DC motor, the current is approximately twice the current measured in 24V DC; speed will be similar for both voltages.
- This self-locking force level is reached only when a short circuit is applied on the terminals of the motor. All the TiMOTION control boxes have this feature built-in.
- Operational temperature range: +5°C~+45°C
- Standard stroke: Please refer to below table

CODE	Load (N)	Min. Stroke (mm)	Max. Stroke (mm)
